

## Whitepaper V1

### **Introduction:**

Dibit Network is DIBIT is a network of independent nodes that provide a decentralized encrypted database service and secure platform on Binance Smart Chain. With that maintains the same and tested and true liquidity protection mechanism that is so important for investors. The Dibit Network team has a lot of people interested in trading using a decentralized databases, but currently the transaction fees are high, so DIBIT Network will solves the main problem that decentralized finance faced in recent past. Our main aim is to run a Decentralized Trading Protocol on the BSC Network that will allow users to transact their Funds easily. It works on the simple principal of the normal trading system but in a safe and hassle freeway. We Pledge to provide prominent and the best service to the users who put out their trust on us. We aim in such a way that our Platform will be used as the symbol to resemble safe and secure trading Experience.

DIBIT Network is a platform for the future of funding that is built on top of the Binance smart chain. It accelerates growth of start-up companies by offering tools and services that save both time and resources.

### **Our Story:**

Several years ago, the conversation within the crypto community was a picture of idealism and hope for a brighter, more equitable future. The artisan in a third-world country able to be paid what her work is worth. The young family storing their wealth in a system free from the legacy of Wall Street cronyism. The programmer creating a revolutionary dApp on the blockchain.

With mainstream attention and barriers to access dissolved in recent years, crypto culture has become a swirling vortex of hype, high-risk schemes, and predatory behavior. One of the few remaining digital wild wests, the token space is buoyed by humor, excitement, and speculative assets. Today, Dibit Network harnesses the enthusiasm and emotion of the crypto space and brings it back to the altruistic core. By marrying the personal incentive with the charitable act, Dibit Network elevates the crypto community and makes philanthropy and humanitarian perspective once again part of the crypto narrative. This is capital that would have never seen its way to a charitable organization, and now unites the community into something for the greater good.

Embracing its roots in decentralized exchanges and financial security, Dibit Network aims to ease the suffering of millions. This begins by participating in fruitful discussions with charitable organizations, educating them about the cryptocurrency space, and opening the gate for real-world charitable endeavors to embrace the blockchain. Through passive transaction fees and active giving, Dibit Network exposes charitable causes to a world of untapped capital, and the crypto audience to a world of good.

### **Our Motivation:**

The dual chain architecture of BSC allows its users to effectively develop and build their own decentralized apps (dApps) and also digital assets on one blockchain. This is one feature that Dibit Network development targets. Moreover, dApps build on this smart chain can take advantage of this fast trading platform to exchange tokens just as fast between one another.

BSC is fully compatible with DIBIT token. It also supports one of the most popular DeFi wallets, MetaMask. It includes pre-integrated pricing oracles (such as ChainLink), which are essential for many sorts of dApps. Switching from Ethereum to Binance Smart Chain has never been easier thanks to this degree of compatibility. BEP-20 token hosted on BSC allows for blockchain bridging.

**Ideal:**

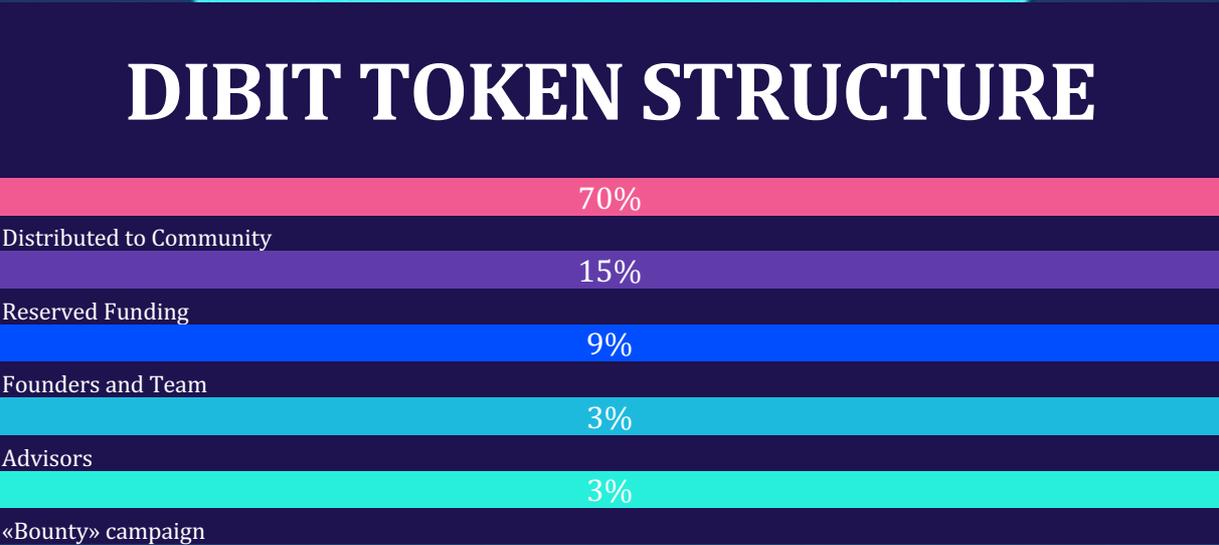

The concept behind Dibit Network is one that is highly scalable and promising and also incredibly approachable to consumers. By finding the ‘equi-foci’ where online experience with its fun meet with the ever-growing valuation of cryptocurrency, Dibit Network stands out in a space that is immensely populated with lackluster and randomization. With the exception of a few innovative experiments, few blockchain initiatives have attempted to market themselves to anyone other than high-value investors or crypto professionals. The

Dibit Network marketing plan also leverages the use of KOLs (influencers) in various Niches and communities especially those connected in a way to the blockchain world. This provides another route and opportunity to further take the Dibit Network to a wider audience and introduce new users to DIBIT.

Additionally, Dibit Network solves a long-standing roadblock to the rise of digital collectibles. Digital collectibles have a lot of promise, but they haven't yet shown to be effective for one reason: Central Issuing Authority. When digital valuables are produced and issued and the rarest or popular collectibles are identified, the inventor are not obligated to stop there. When this happens, the value of the original tokens is diminished, and they may become worthless or less valuable.

With Dibit Network, Developers are not a central authority in the release of collectibles. This is based on the gameplay as there is already a maximum circulation limit for DIBIT tokens in the Dibit Network universe. This prevents the possibility of having worthless tokens

**Distribution:**

Contract Adress: 0xec73b4faa3dc7a84ec5f1fe3b03f626a14f0fceb

Supply:100,000,000,000,000 DIBIT

### **Market environment:**

Decentralized Finance: the next big thing in Dabit Newtork is already, decentralized finance (DeFi) has emerged as the most exciting innovation in binance smart chain. DeFi solutions rely on smart contracts and blockchain technology to deliver financial instruments that are mutualized, peer-to-peer, permissionless, and fully automated. These can be assembled into even more complex solutions to further drive rapid innovation. DeFi solutions currently fall into a few prominent categories.

These include:

- Prediction Markets (Gnosis and Augur)
- Collateralized Lending (Aave)
- Collateralized Stable Assets (DAI)
- Automated Market Makers (Pancakswap, Uniswap)
- Derivatives (Synthetix and Oyn)
- Smart Contract Insurance (Nexus Mutual)
- Permissionless Aggregators (Zapper)
- Non-Fungible Tokens (NFTs) are also now used to generate value from digital collectibles, gaming tokens, digital art, and other goods and services in a permission less manner.

DeFi for Retail Users An Incredible Market Potential With its total value locked approaching \$20 billion, DeFi represents a fantastic opportunity for exponential growth in the coming years. Up until recently, investments in cryptocurrencies were mostly limited to often promising but fairly primitive instruments such as bearer assets and tokens. Whilst opening a directional trade on the right volatile asset at the right time might prove profitable, these strategies rarely allow for intelligent risk management.

As such, whilst the potentially high returns on offer through crypto-markets may have attracted the curiosity of many retail users in recent years, the entailed risks and the lack of instruments to handle them properly have kept most from venturing into these markets. DeFi, however, has the potential to really shake up the status quo

**Disclaimer:**

The Dibit Network token is classified as a ‘Virtual Financial Asset’ in terms of the applicable Finance ‘Virtual Financial Assets Act’ (Chapter 590 of the Laws of Europe) (the ‘VFA Act’) The Dibit Network token have the characteristic required to be considered a transferable security, money market instrument, unit in collective investment schemes, a digital currency, commodity, security or any other form of investment in any jurisdiction.

This white paper is compiled in accordance with the requirements and provisions of the VFA Act and is in the process of being registered with the relevant competent authority, the European Financial Services Authority. As at the date of this white paper, no other registrations, approvals or licensing requirements apply for the Dibit Network in terms of applicable European law.

This white paper does not constitute a prospectus or offering document and is not a solicitation for investment and does not constitute an offer of financial instruments, securities to the public or a collective investment scheme. Any decision to purchase Dibit Network tokens shall be based on consideration of this white paper as a whole.

The Issuer reserves the right to (i) make changes to this white paper and any documents linked to the Dibit Network and/or holding and use of Dibit Network to ensure compliance with the applicable regulatory requirements and (ii) , do all that is necessary to be in compliance with any regulatory requirements, including but not limited to, interrupting, suspending or ceasing the operations or trading of the Dibit Network if deemed necessary at the Issuer’s sole discretion.

It is solely up to you to ensure that no prior or subsequent approval, notification, registration or license is needed or if such is needed, it is solely up to you to obtain such prior or subsequent approval, notification, registration or license or require any form in the country where you are a citizen, national, resident or having a similar connecting factor, or incorporated, registered or effectively managed, and the Issuer shall not in any way be liable for any non-conformity of the above by you.

This white paper, the Dibit Network tokens and/or the holding, use and trading of the Dibit Network carries no rights, whether express or implied, other than for their use on the decentralized platforms and trading on cryptocurrency exchanges, Dibit Network tokens do not represent or confer any ownership right or stake, share or security or equivalent rights, intellectual property rights or any other form of participation relating to the Issuer. Dibit Network do not give you any entitlement to acquire any such interest or entitlement in respect of the Issuer.

The administrator of the Issuer, as identified in the Considerations section of this white paper, are the persons responsible for the information contained in this white paper. To the best of the knowledge and belief of the administrators of the Issuer (who have all taken reasonable care to ensure such is the case), the information contained in this white paper is in accordance with the facts and does not omit anything likely to affect the import of such information.
